General information about public transport today

Public transport sub-systems include:

Covid-19 worldwide

In December 2019, the first case of infection with a new coronavirus called COVID-19 was confirmed.

On January 30th, 2020, The Director-General of WHO declared the novel coronavirus outbreak a public health emergency of international concern.

According to the WHO report, to this day in the world:

Over 69,000,000 confirmed cases of COVID-19, including over 1,500,000 deaths

According to the WHO report, to this day in Serbia:

Over 220,000 confirmed cases of COVID-19, including over 2,200 deaths

On March 6, 2020, the first case of COVID-19 in Serbia was registered

What MEASURES have been implemented?

From the very beginning of the crisis caused by the spread of the covid-19 virus, the Secretariat for Public Transport has taken an active part in all activities aimed at preventing the spread of the virus and protecting the environment. SfPT have collected world experience regarding this problem, and translated UITP's document **Management of COVID-19: Guidelines for public transport operators**

Health safety measures :

- The level of hygiene maintain in public transport vehicles has been raised
- Distribution of hygiene products and protective equipment
- Recommendation on wearing protective equipment in PT vehicles
- Keeping a safe distance
- In taxis, the reception of passengers in the front seat is temporarily suspended
- Suspension of ticket sales by drivers

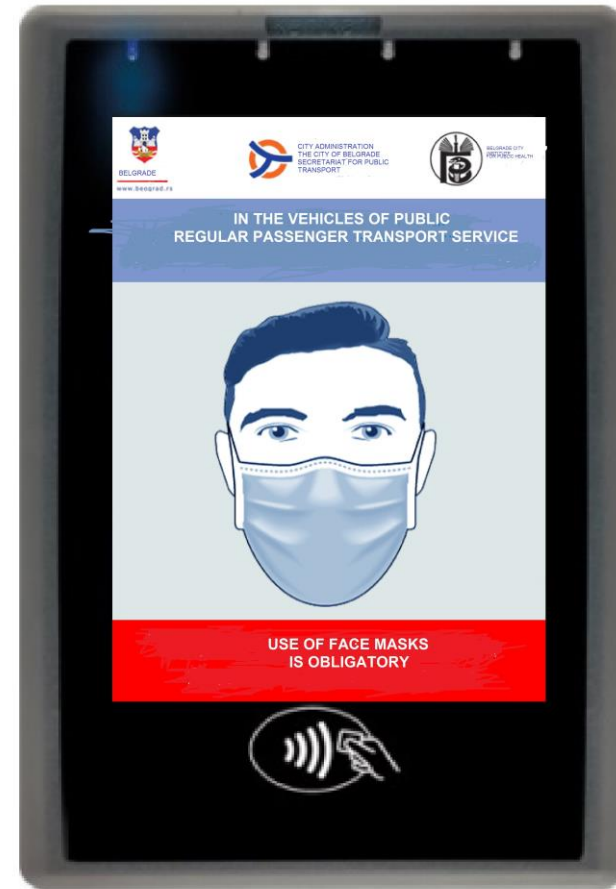

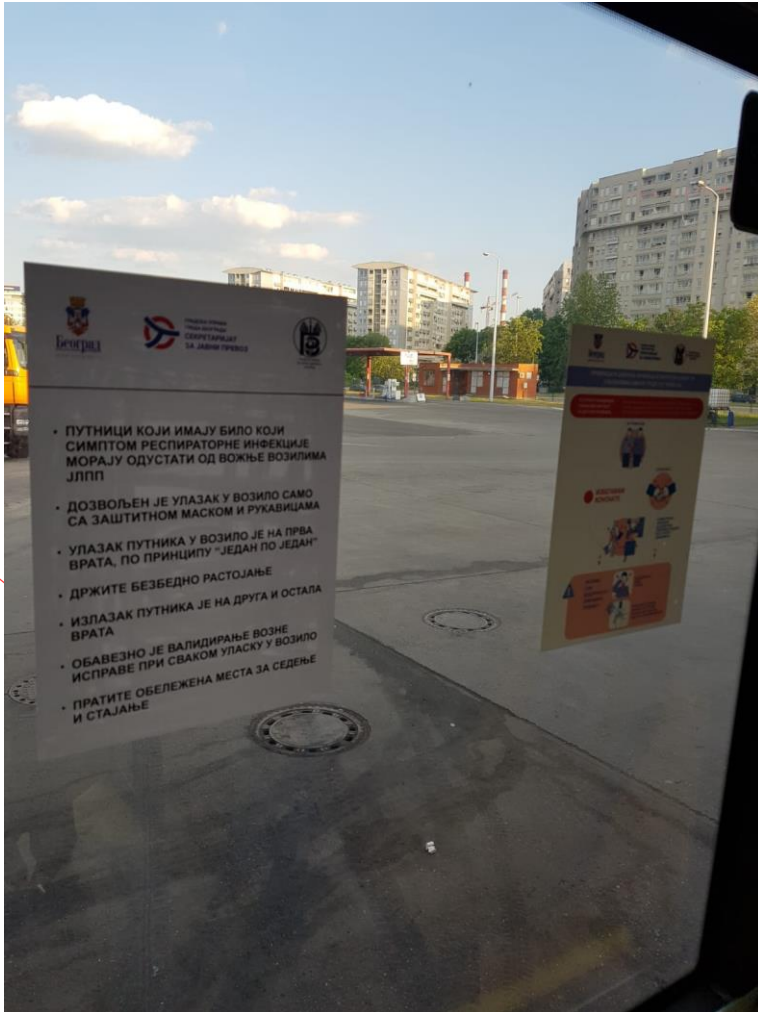

Preparatory activities of the Secretariat for Public Transport to the pandemic

- **On March 13rd, 2020**, Secretariat for Public Transport (SfPT) temporarily:
 - Suspends ticket sales by the drivers
 - Suspends entry through the front door in PT vehicles
 - Introduces a physical barrier between the driver and the passengers
 - Changed work of controllers (ticket control is performed at terminals and stops)

Instructions in public transport

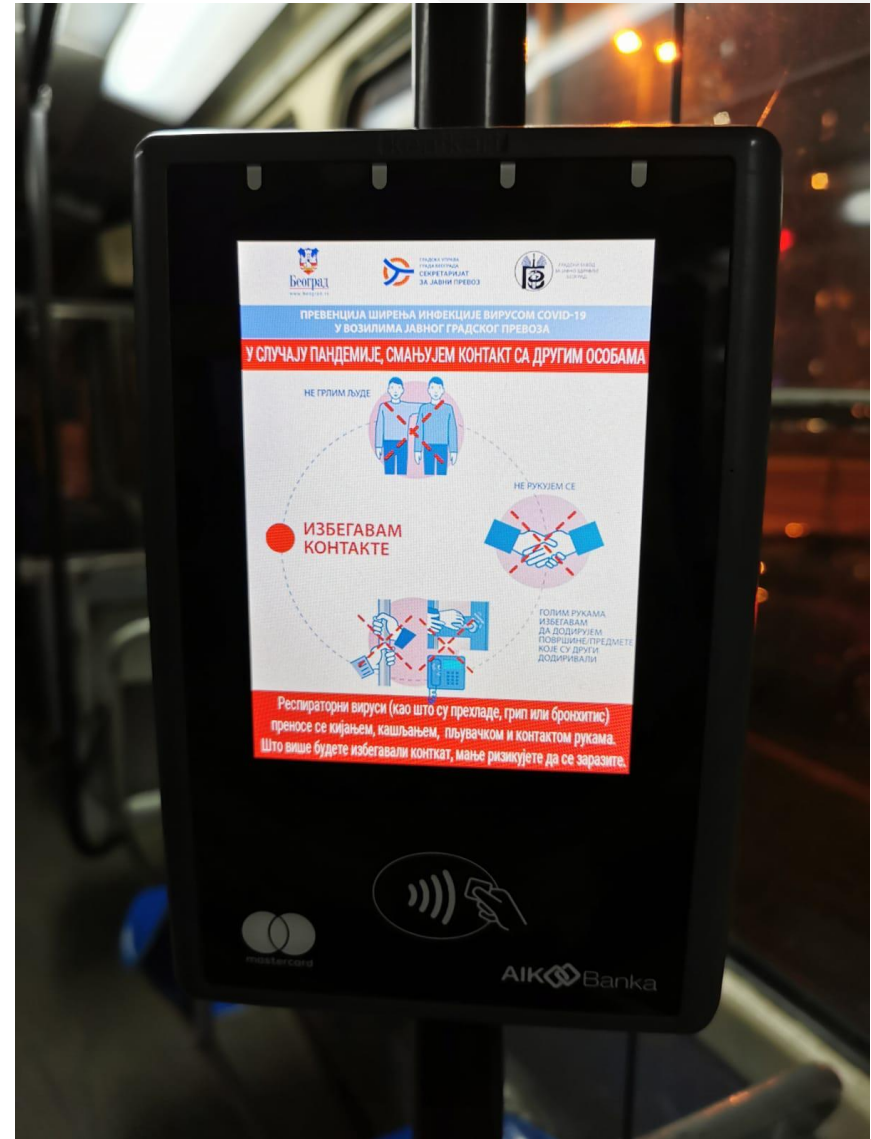

- **On March 14th, 2020**, posters with general instructions on safe behavior of passengers in public transport were made and placed on public transport stops and vehicles in the city and suburbs,
- On about 4000 validators in all 1600 vehicles, general instructions on safe behavior of passengers were placed.

Čukarički	160	2
Žuti taxi	147	2
TOTAL	6114	71

Changing the mode of operation of public transport

In the period from 17.03.-21.03.2020., the SfPT made changes to the timetable:

- Carriers have been ordered to apply the Saturday timetable on weekdays
- Night transport suspended
- All minibus express lines have been canceled

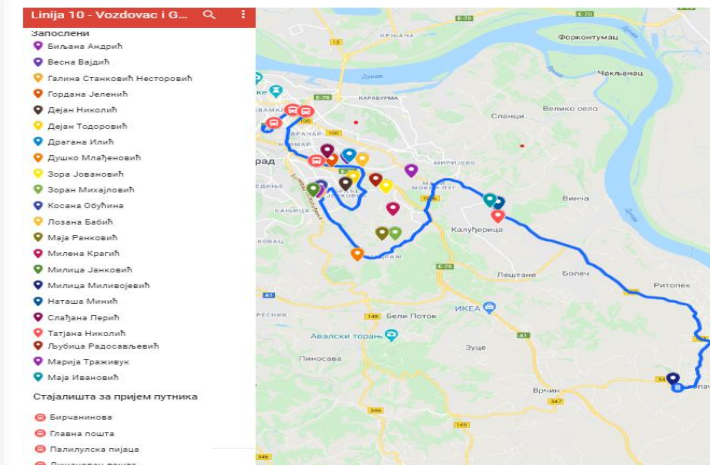

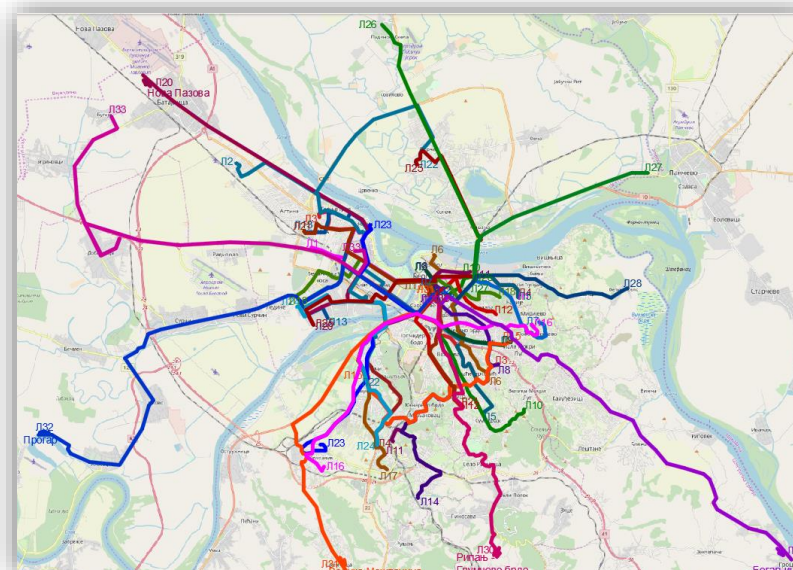

From March 21st 2020, in accordance with the Decision of the Government of the Republic of Serbia, the Secretariat for Public Transport has temporarily abolished public transport on all lines of urban, suburban, and local transport and all departures on all lines of BG trains

What MEASURES have been implemented?

Service level - Mobility management:

- Changing the PT network depending on the stage of the crisis (from **530** regular to **80** special lines /34 urban + 46 suburban/, from **1.664 vehicles** in a regular situation to **273** in an emergency situation)
- The only operators during the state of emergency were PUC GSP “Beograd” and Consortium SP Lasta ,
- Change the number of departures and the number of vehicles in service depending on the stage of the crisis (from **30.000 departures** daily on all lines to **2.000 departures**)
- Number of passengers/day (journeys/day) in the public transport: decreased from **2.5 million** to **35 000**
- Special transport of employees in the City Administration of the City of Belgrade - 10 minibus lines
- Free transportation by special lines for medical staff, army, police.
- Revenue from fares collected decreased from **5,900,000 EUR** per month to **1,670,000 EUR** per month

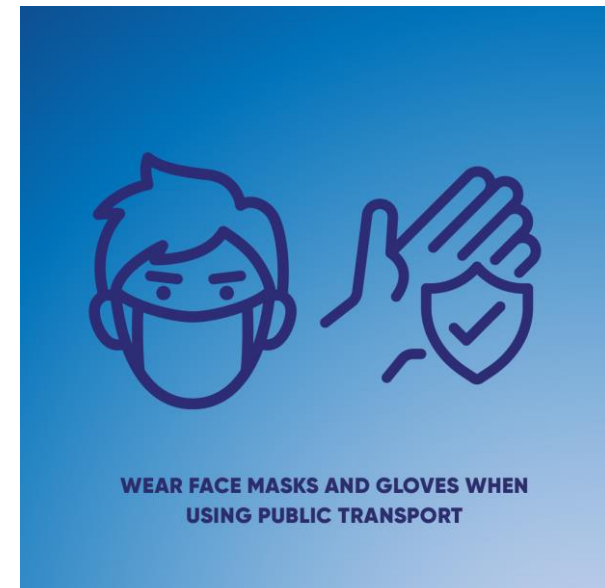

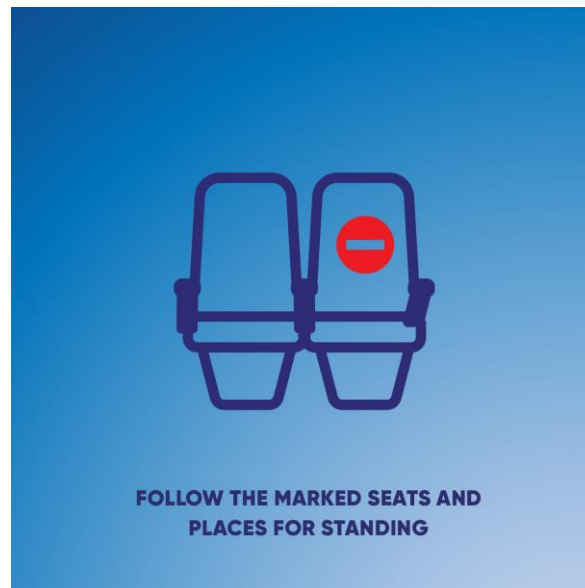

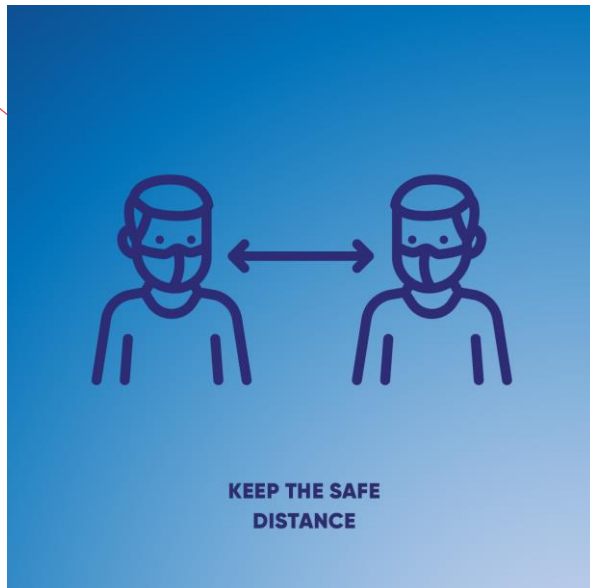

Distribution of protective equipment to operators

In the period from 24.03.- 08.04.2020. year, the Secretariat for Public Transport distributed a total of 30,000 protective masks and 26,000 protective gloves:

- 23,000 masks and 20,000 gloves were given to JKP GSP "Belgrade",
- 7,000 masks and 6,000 gloves were given to SP "Lasta",

for the needs of maintaining special lines of urban and suburban transport, for the transport of health workers and non-medical staff

Preparations for the first phase of re-establishment public transport

In the period from 23.04. - 08.05.2020, the SfPT is working intensively on preparatory activities for the re-establishment of public transport:

- Defining and preparing timetables,
- Communication and exchange of experience with undertaken activities in other European cities
- Communication and coordination with the City Institute for Public Health Belgrade in order to obtain guidelines and recommendations for the protection of the health of users and officials who participate in the work of public transport.
- Preparation of solutions and materials for marking public transport stops and vehicles in order to protect the health

**The Decision to lift the State of
Emergency was made on May 6th,
2020**

From May 8th, 2020, passenger transport was carried out by using 1058 vehicles (916 buses, 74 trams, 64 trolleybuses and 4 electric buses) on urban lines, and 234 buses on suburban and local lines.

This timetable implies 77% of departures compared to the regular situation.

Re-establishment of public transport

On May 7th, 2020, SfPT with the City Institute for Public Health Belgrade promoted the epidemiological measures adopted after the re-establishment of public urban passenger transport.

The measures provided for:

- protective equipment is worn by users and driving staff,
- entry and exit of passengers at the marked doors,
- marking the seats on which the sitting of passengers is allowed or prohibited,
- marking standing spaces in the vehicle,
- control of compliance with epidemiological measures by sanitary inspectors and communal police

Promotion of epidemiological measures and marking of PT vehicles

May 7th, 2020

Marking PT stops

Marking the interior of the PT vehicles

Promotion of new measures – Ozonation (twice a week) and hand sanitizers in public transport vehicles

December 13rd, 2020

Control of compliance with epidemiological measures

Control of compliance with epidemiological measures was supported by SfPT and realized by sanitary inspectors and communal police

WHERE TO GO?

- Exchange information between cities in different countries
- Informing citizens
- Alternative modes of transport
- Timely adoption and implementation measures of Headquarters for Emergencies at the level of the state and local self-government
- Timely supply of operators with protective equipment (masks and gloves) and vehicle disinfectants

HOW TO TRANSITION TO A BETTER FUTURE?

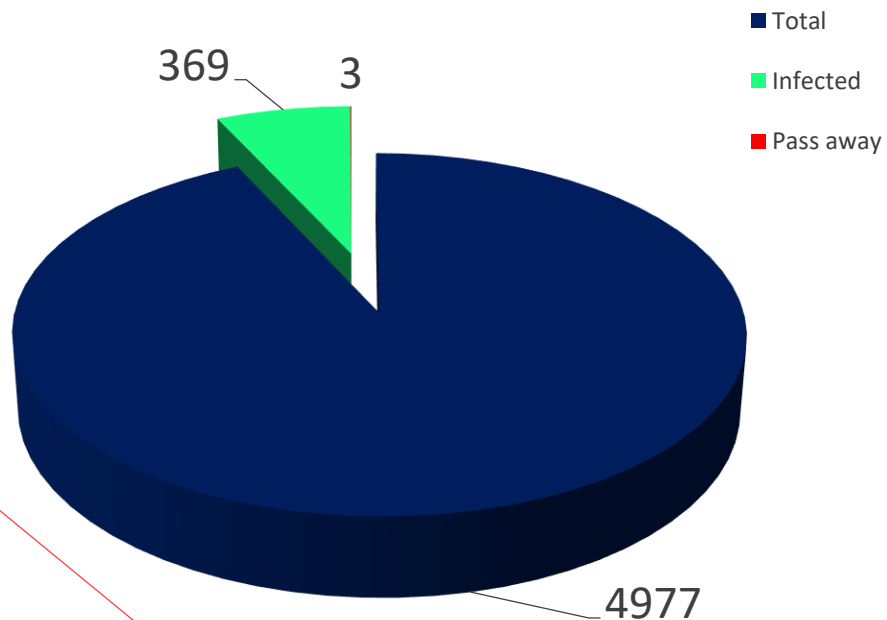

- Contactless payments
- Application of innovative solutions
- Forming regional and international working groups aiming to exchange ideas on how to overcome the crisis
- Influence on passenger awareness, placement of new measures and solutions through the media
- Promoting the use of cycling and walking

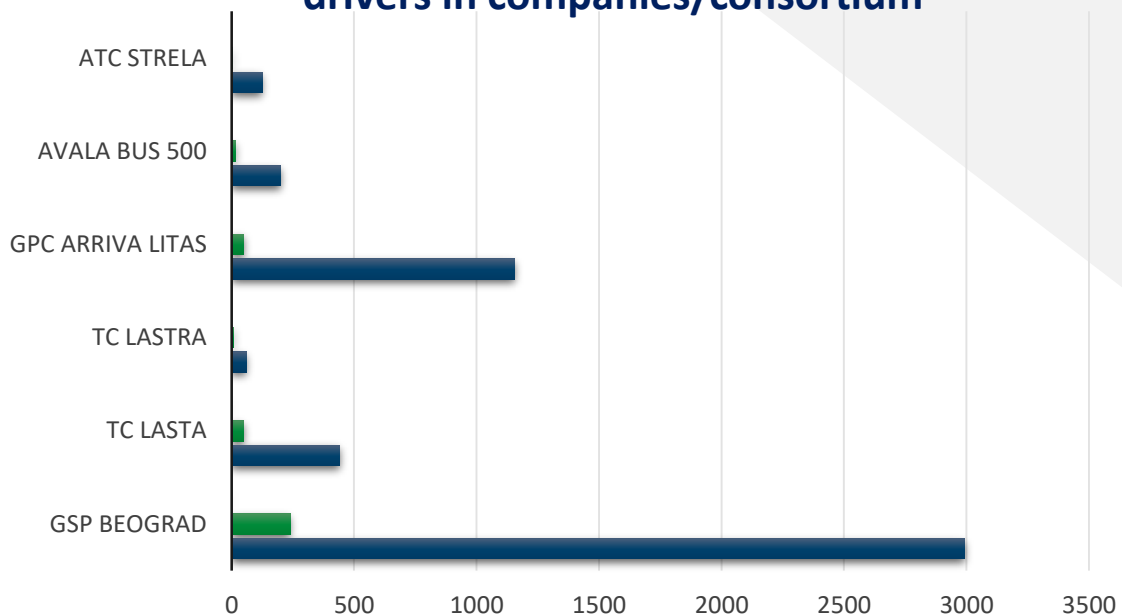

Impact of COVID-19 on PT employees (drivers)

Number of drivers in PT in Belgrade

From March to December, number of infected drivers in companies/consortium
